## BIOCHEMISTRY \& BIOPHYSICS B.S. - FALL 2023

Biochemistry and biophysics, closely-related fields, use tools from different sciences to study life. This program includes thorough grounding in mathematics, chemistry, and physics, along with modern biochemistry, biophysics, and molecular-level biology. Students are trained in cuttingedge research approaches to biological problems.

## Footnotes

1. Students who apply Advanced Placement credits in place of BIOL 1010/1015 may take BIOL 2120 \& BIOL 2125 in its place.
2. Students must take 1 of the following Laboratory courses alongside BIOL 1010 Introduction to Biology: BIOL 1015 Introduction to Biology Laboratory OR BIOL 1016 Introduction to Biology Computational Laboratory. Biology, Biochemistry and Biophysics, Biological Neuroscience majors, and/or students seeking a hands-on wet-lab experience are recommended to register for BIOL 1015. Computational Biology majors, Non-biology students, and/or students who seek to enhance their skills in data analysis are recommended to register for BIOL 1016. Students cannot get credit for both BIOL 1015 and 1016.
3. Humanities and Social Sciences (HASS) Core Electives: A total of 24 credits of HASS Core Electives should be taken. Students should take an Inquiry course during their first year. For a listing of HASS Inquiry courses go to: https://info.rpi.edu/hassinquiry. In addition, students should take a HASS Communications Intensive course during their first three semesters.
4. For students who have applied for and been granted an exception, The Arch Summer courses would be taken during the fall semester. For listing of the exception process go to: http://info.rpi.edu/arch/students/\#ExceptionProcess
5. Molecular Biochemistry I \& II, molecular biophysics modules, and laboratory options cannot be satisfied with transfer credits.
6. Students may substitute Macroscopic or Microscopic Physical Chemistry (CHEM 4410 \& CHEM 4420).
7. The Advanced Lab Option fulfills the Communication Intensive ( CI ) major requirement and the Culminating Experience requirement.
8. Restricted Electives: at least 6 credits in science or engineering. Restricted electives must be 4000 level courses. Molecular Biophysics Modules, Laboratory Option, and the Quantitative Option may be taken in different semesters than those shown if electives are shifted. Only 2 credits from research, mentoring, or independent study courses may count toward this requirement.
9. Senior Research Thesis (BCBP 4990) is recommended; however, students may substitute with any of the BIOL, BCBP, or CHEM courses listed below.
